THE EDWARD J. CANNING COMPANY

Landscape Architects and Nurserymen

NORTHAMPTON, MASS.

Guarantee: We guarantee that all plants sent out shall leave our hands in first class condition and that they shall be true to description, and if through error any prove untrue, to replace them without charge. It is obvious that we cannot guarantee that customers will make them live, as we have no control over conditions after they leave our hands. We will, however, agree to replace any that die from other causes than neglect, providing the purchaser agrees at the time of sale to an increase over list prices of 10%. This does not apply however, to roses and fruit trees which we guarantee to live through the first summer.

Prices: Prices in this list are net except where extensive plantings warrant special quotations.

LANDSCAPE DEPARTMENT

We are prepared to make surveys, design plans and write specifications for all sorts of landscape work. A nominal charge is made for the time consumed in this work and for expenses incurred depending entirely upon the size and complexity of the problem.

FRUIT DEPARTMENT

We have found it the best policy to get fresh stock every year of the standard varieties of apples, pears, plums, peaches and cherries and since the market constantly changes it is impractical to list the varieties. We can be relied upon to have a good selection in the early part of the season and guarantee all plants to be thrifty healthy stock. We also carry a line of small fruits such as currants gooseberries, grapes, etc., and Asparagus. We carry only those varieties which we can recommend for planting in this vicinity.

HERBACEOUS PERENNIALS

Our stock includes all the commonly known garden flowers and a number of the newer hybrids as we find them practical for this locality and climate. Prices on this stock are in general 25¢ each, \$2.50 per dz. \$20.00 per hundred depending entirely upon size of plants and rarity of species.

FERTILIZERS

Some of our clients have found it convenient for us to prescribe for their lawns and gardens and consequently we have obtained a limited supply of sheep manure, chemical fertilizers, and special combinations made up according to thoroughly reliable formulae. Prices upon application.
